AI at Work

The back 2 Work campaign was a huge success

- Featured worldwide
- 3000+ Repo hits
- More than 300 copies / downloads

Customers liked

- Out of box ready to go
- Completeness of solution
- Overarching approach
- PAYG less use

Now we are making it even better!

The Ambition

- You follow a clear AI strategy: work smarter, not harder
- With Microsoft 365 Copilot, Chat and Agents AI is on every desk
- You want to ride the wave of being leading to maximize value

The Challenge

- Resources are rare and the organization is complex
- New features every month need according user adoption
- Existing content is hard to discover and not individualized enough
- Employees, IT and comms as well as existing channels are overloaded

The Solution

- one single place with curated content --> *easy to find*
- guiding users on different maturity levels --> *individual approach*
- linking to internal as well as external resources --> *extend- & customizable*
- Work in progress: active agent nudges on demand --> *maximum outreach with high attention*

The Result

- Improved user experience through individual pace and content
- Reduced load based on high level of self-service
- Faster time to value as all possibilities to use are leveraged
- Stronger execution on strategy whilst strengthening learning culture

GREAT THAT YOU TAKE THE LEAD

Solution Details

The solution package consists of different pieces being strongly tied to each other, delivering a one stop shop experience. It is highly customizable, giving you all freedom to change and adapt.

AI at Work Agent	• Straight forward user interaction and support, always available • evaluating user maturity to provide most helpful contents • Guidance through advanced conversation capabilities
Curated Content	• Free to use workplace AI foundations learning path • Hand-picked public resources from Microsoft for all maturity levels • Add your internal contents to maximizie value
Proactive Outreach	• Agent able to proactively reach out to users via adaptive cards in Teams • Address specific user groups or the whole organization, based on Entra ID groups • Making sure to keep everyone well informed no matter if features, events or best practises
Extensibility	• Add your internal landingpages and resources as links for easy discovery • Extend the agents knowledge by connecting your own sources • Connect 3rd party systems, ticketing, knowledge bases and other repositories to streamline

AI at Work Agent - out of the box experience

Comms Workstream

Proactively informs at least monthly about wins & success, current status & internal events through nudges via Agent.

Users benefit from added visibility of offerings, feel more included and gain deeper understand of AI strategy approach.

Customer connects to
- internal comms channels

Customer links to
- Internal landingpages
- Strategy paper
- Internal blog

Business Units & Champions Community

Proactively shares scenarios, usecases and business cases as well as added value and champions successes through agent nudges.

Users benefit from shared knowledge, are ideated from real life examples and build on each others experiences.

Customer connects to
- Line of business applications

Customer links to
- Internal landingpages
- Champions Community
- Business Unit specific content

Training Workstream / HR

Proactively shares new trainings, webinars, content and successes via agent nudges.

Users benefit from timely information, deepened knowledge and improved visibility of offerings.

Customer connects to
- internal Learning Management System

Customer links to
- Internal landingpages
- AI Use policy
- Internal training content

IT & DEV Workstream

Proactively shares monthly updates on new capabilities, features and roadmap as well as 3rd party integrations via agent nudges.

Users benefit from, shorter time to value, improved experience and immediate support

Customer connects to
- Supporttool
- Internal Knowledge Base

Customer links to
- Internal landingpages
- Internal FAQ
- Internal Roadmap
- Internal Community

Point me to the roadmap and community resources for Copilot updates

Agent what 🤔
Give me 2 examples of agents and a guide to start building my own

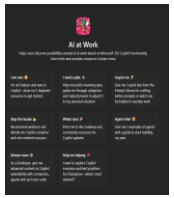
Finds information and receives news only through one single channel, making it easy to discover and interact

This stays and evolves in the package

Adoption Agent

At-hand-support

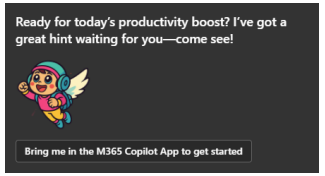
- Agent Builder, Studio, Teams pinned
- NO PAYG



Proactive Nudges

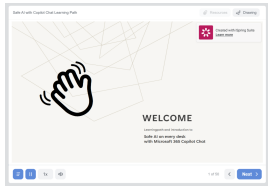
Maximum visibility

- 1:1 Agent Chat in Teams
- Direct transition to Copilot App
- Helpful resources & answers
- No premium connectors



Learning Path

- Ready to go in browser
- Or **LMS import as SCORM** fully customizable
- **DE upcoming**



Collateral

- Material ideation
- Ootb Success Kit contents

This has been added

Great Copilot Journey

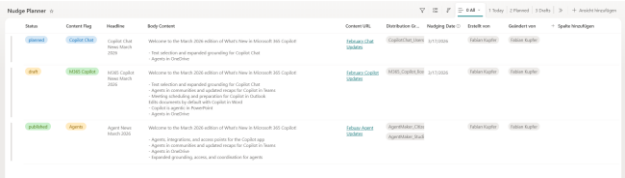
Proactive approach

- Distributed through agent
- Planable & editable
- Ready to go in SPO
  original source

Nudge Planner

Keeping Information flowing

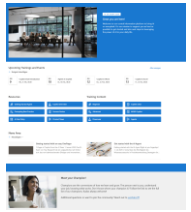
- E.g. formMonthly evergreen updates
- Targeted groups
- Highly visible channel

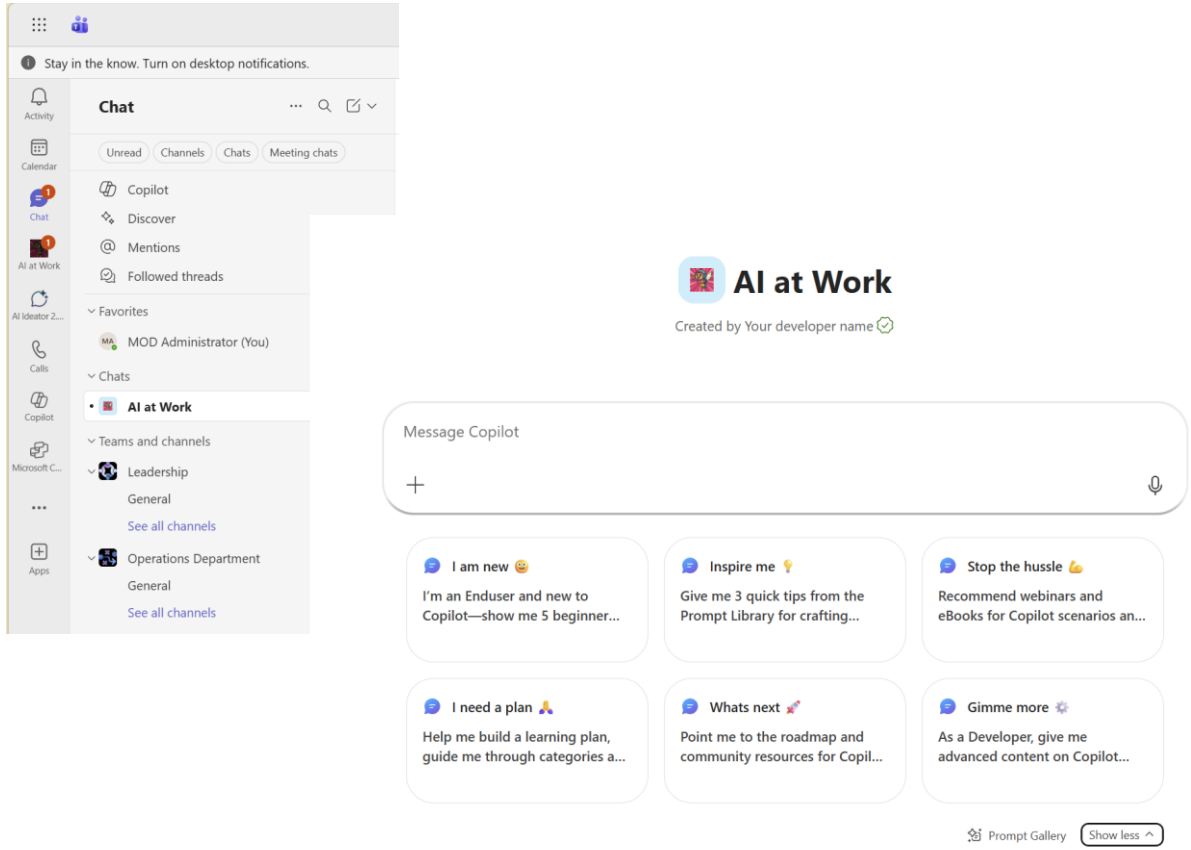


SPO Landingpage

Single Go-To location (coming soon)

- One Stop hub linked to agent
- Stuffed with success-&trainer kit
- Connected to best practise Champions Teams site / structure





Agent Experience

- Lives as Agent in M365 Copilot App
- And as App in Teams
- Proactive Nudges are published in Teams 1:1 Chat
- NO PAYG

Core value:

- enable the complete organization on AI at work with Microsoft 365 Copilot Chat and above
- From Beginner to Advanced to Expert and Developer - according Personas and Maturity levels are built in
- All content can be adjusted as needed

MIT License, free to go on GitHub
- Current v2.3 sources as txt for easy copy&paste
- Full solution package for download incl. Needed Flows + Sharepoint list definitions & schemas

Agent Enduser Experience

Anticipated or explicit User Maturity orientation

Leading to more relevant results

i am cloud solution architect

AI at Work

Thanks for sharing your role! As a **Cloud Solution Architect**, you'll benefit most from resources focused on **Copilot extensibility, integration, and advanced scenarios**. Here are my top recommendations for webinars and eBooks tailored to your persona:

✅ 1. AI Agents Webinars

Deep dive into building and managing AI agents with Copilot Studio.

Join Webinars

✅ 2. Copilot Developer Camp

Hands-on labs for developers and architects to extend Copilot and integrate with custom solutions.

Explore Developer Camp

✅ 3. Agent Overview Guide

A practical deck explaining agent architecture, use cases, and deployment strategies.

Copilot Chat Journey Content ☆

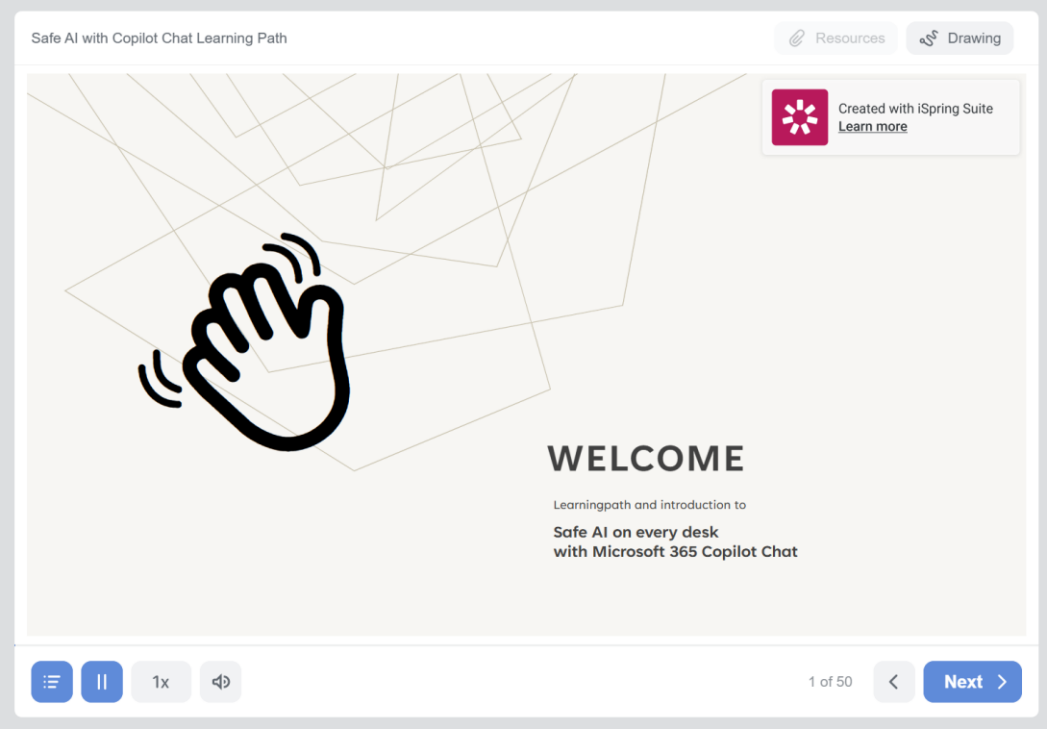
Day	Headline	Subject	Prompt	Prompt Link	Additional Information
1	Communicate like a pro with Microsoft 365 Copilot Chat.	Welcome to the Great Copilot Journey for Microsoft 365 Copilot Chat. Over the next six weeks, you'll embark on a daily email series that will transform how you work with Copilot Chat. Each week focuses on a different skill, and each day you'll receive a single prompt to practice as you go through your day. It's an easy and quick way to become a pro at using Copilot Chat, one simple prompt at a time. This week, we kick things off by elevating your writing and communication prowess. Ready? Let's dive in! Just click on the link, or open Copilot Chat and type in this prompt:	Prepare a daily brief of news from the [finance industry] regarding [cryptocurrency].	https://www.mi... d870f6cd-4aa5-4d42-9626-ab690c041429/...	Looking for a bit of humor? Tailor this prompt to match your desired tone and style. Pro tip: Simply hover over a submitted prompt and click the bookmark icon to save it or share the link with your team. To learn more or see what's ahead on your journey, visit aka.ms/Copilot/ChatJourney.
2	Communicate in other languages with Microsoft 365 Copilot Chat	Discover a world of communication with Microsoft 365 Copilot Chat! Effortlessly translate text into other languages and explore how easy it can be to break language barriers. Click on the link, or open Copilot Chat and type in this prompt:	How do you say [thank you for your time] in Japanese?	https://www.mi... d870f6cd-4aa5-4d42-9626-ab690c041429/...	Ask Copilot to translate text into your preferred language, making it easier to connect and communicate with others around the globe. Love this prompt? Hover over a submitted prompt and click the bookmark icon to save it or share the link with your team. To learn more or see what's ahead on your journey, visit aka.ms/Copilot/ChatJourney.
3	Write an email with Microsoft 365 Copilot Chat	Get ready to revolutionize your email game with Copilot Chat! Imagine drafting emails that are polished, professional, and tailored to your needs—all with a few simple clicks. Let's do this! Just click on the link, or open Copilot Chat and type in this prompt:	Draft an email to [Mila] about [reviewing the proposal by FriDay].	https://www.mi... d870f6cd-4aa5-4d42-9626-ab690c041429/...	Add specific details or try pasting an email and letting Copilot craft a polished response for you. Want to use this prompt again? Hover over a submitted prompt and click the bookmark icon to save it or share the link with your team. To learn more or see what's ahead on your journey, visit aka.ms/Copilot/ChatJourney.
4	Improve your writing with Microsoft 365 Copilot Chat	Unleash your inner wordsmith with Microsoft 365 Copilot Chat! Whether you're crafting an email or polishing a report, Copilot Chat is here to help elevate your writing to captivate your audience. Just click on the link, or open Copilot Chat and type in this	Analyze the text in the following and make suggestions on how to improve it: [Insert text].	https://www.mi... d870f6cd-4aa5-4d42-9626-ab690c041429/...	You can also upload a Microsoft Word document and get feedback from Copilot to streamline it for you. Find this prompt useful? Simply hover over a submitted prompt and click the bookmark icon to save it or share the link with your team.

Great **M365 Copilot & Copilot Chat Journey** overarching, well pepared **adoption approach** content **incorporated and editable** in Sharepoint.

Plan **Company wide campaign**, address specific usergroups, **automated license-check** for relevant content selection.

Proactive approach

- Distributed through agent
- Planable & editable
- Ready to go in SPO
  original source



Learning Path Experience

- Ready to go
- Also importable as SCORM
- Or fully adjustable as PPT
- Accompanied by Journey nudges == perfect fit

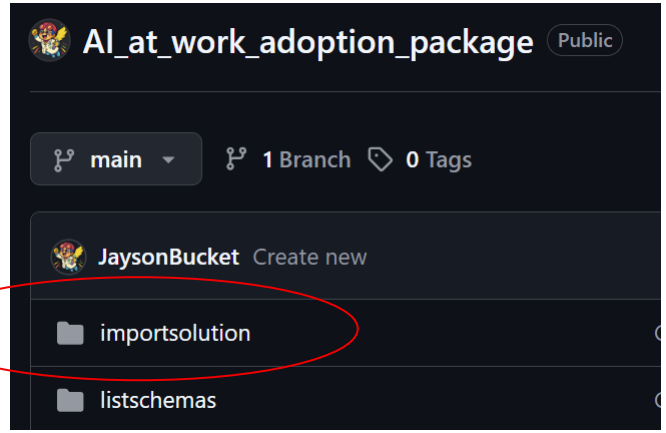
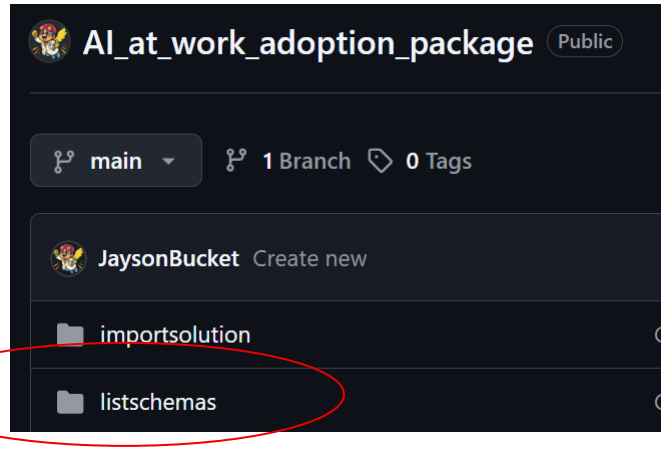
Setup Walkthrough

- [All sources on GitHub]
- Import Solution
  - containing Agent + Nudge Flows
  - Update connections as prompted
  - Ignore Environment setting in first place (leave as it is)
  - Publish Agent from Copilot Studio (share with whole org)
  - Approve Agent publishing in M365 Admin Center
    - Make accessible for whole org
    - Deploy for whole org
    - Pin in M365 Copilot App for everyone
  - Approve Agent App in Teams Admin Center
    - Edit app setup policy --> add app + deploy/pre-install for everyone
    - Add to pinned apps for everyone (Global default policy)
- Setup Sharepoint Lists
  - Create a new blank sitecollection
  - Add lists --> upload each schema template from repository
  - Mind List naming and data types
    - stick to names, don't change
    - follow outlined data types
- Update Environment variables
- ! Publish all variable changes!
- Make a testrun

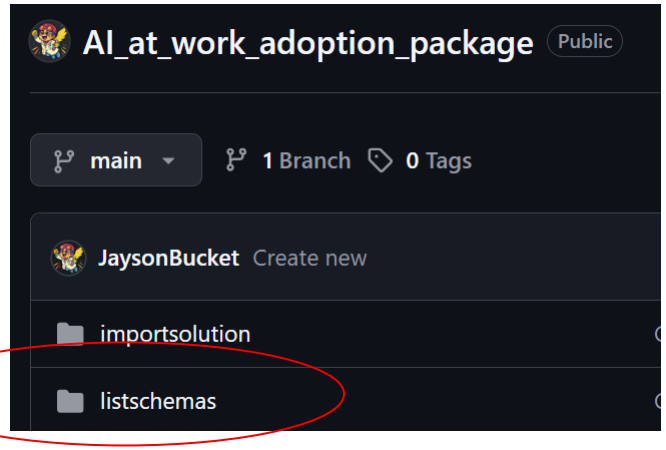




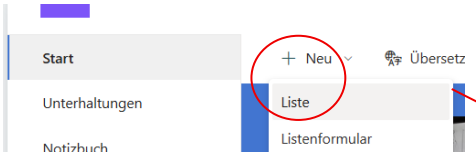
[Setup walkthrough for similar solution on YouTube]

Sharepoint List setup

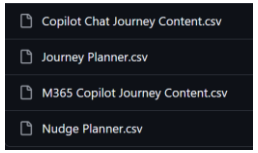
- [All sources on GitHub]
- Setup Sharepoint Lists
  - Create a new blank sitecollection
  - Add lists --> New -> List -> upload each schema template from repository
  - Mind List naming and data types
    - stick to names, don't change
    - follow outlined data types

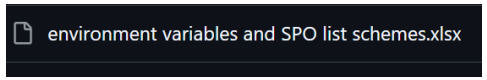


Repeat for every single csv

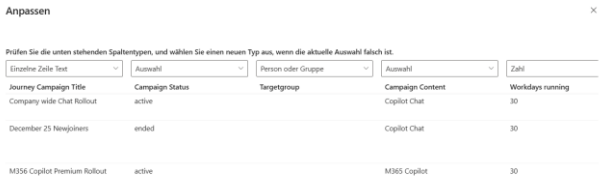


Upload one

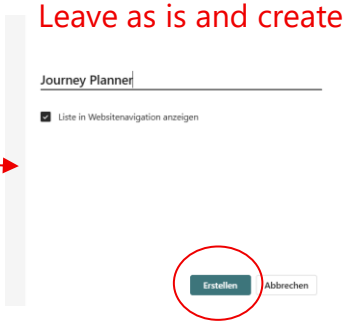




Check data types listed in excel



Leave as is and create

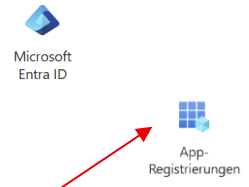


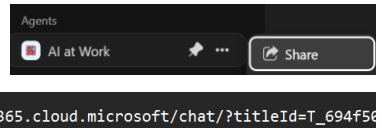
Before testing the Flows, make sure you checked dates & selected target groups + owner

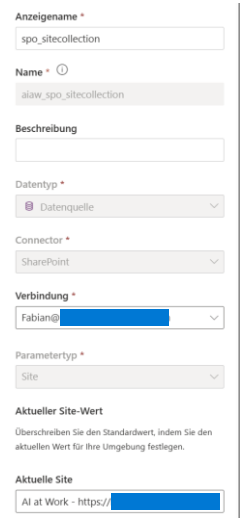
Environment Variable setup

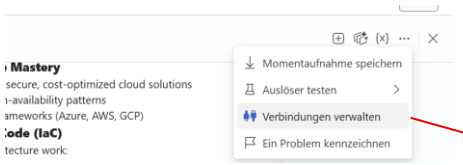
- These variables are used all over the solution
- Once set, everything is ready to go

Display Name	Environment Variable Name	DataType	Where you get it
admin_group_id	aiaw_admin_group_id	Text	Azure Portal -> Entra ID -> Group -> ObjectID
agent_app_id	aiaw_agent_app_id	Text	Azure Portal -> App Registrations -> Agent -> Application ID (Client)
agent_teams_bot_id	aiaw_agent_teams_bot_id	Text	Agent Editor in Copilot Studio -> ... next to test window -> connection settings -> copy „cr....“ value from URL
agent_title_id	aiaw_agent_title_id	Text	M365 Copilot App -> ... next to Agent -> share ->-> paste in editor -> copy everything after „T_“
journey_testmode_enabled	aiaw_campaignmode_enabled	yes/no	Just set on yes or no
spo_journey_chat_content	aiaw_spo_journey_chat_content	Text	After setting up the list -> List Settings -> Listname, Description, Navigation -> Name
spo_journey_planner_listname	aiaw_spo_journey_planner_listname	Text	Same
spo_journey_premium_content	aiaw_spo_journey_premium_content	Text	Same
spo_nudge_planner_listname	aiaw_spo_nudge_planner_listname	Text	same
spo_sitecollection	aiaw_spo_sitecollection	Datasource	Select created sitecollection as datasource
testmode_enabled	aiaw_testmode_enabled	yes/no	Just set on yes or no









Flows you get

- Enable Flows to test
- Check testmode environment variables for first try
- Set trigger-time wisely → both flows are setup to run once a day
- Setting shorter trigger is OK for planned nudges
- Setting short trigger will lead to additional nudges for Journey
- Flows are completely set up and working solely with the environment variables you already set up, no need for changes
